An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the abstract, move the second sentence to immediately follow the first sentence thereby forming a single paragraph.

The following is an examiner's statement of reasons for allowance: Iwami '667 has no example that meets all of applicant's ranges and no general teachings regarding hydroxyl number, MW and NCO/OH ratio. Composition 6 has too low a NCO/OH ratio. Composition 7's average MW for the two polyesters would be too low. Composition 7's individual polyester having the correct MW and hydroxyl number would not have the proper NCO/OH ratio because a significant portion of the OH in the reported overall NCO/OH ratio is supplied the other nonqualifying polyester. In other words $1.2 = \text{NCO}/(\text{OH}_{p1} + \text{OH}_{p2})$. Whereas applicant would require $\text{NCO}/\text{OH}_{p1}$ to be 1.0-1.6. Furthermore, aqueous polyester polyols would inherently necessitate some acid groups for water dispersability/solubility that would not be present in Iwami's solvent borne polyester polyol.

The examiner is unable to locate any reference that actually produces a paint used in the instant claims. References such as Patzschke '822 arguably renders obvious the paint, but this in addition to placing the paint on a golf ball would not be a

reasonable rejection especially in view of applicant's table 3 showing the criticality of OH number and MW.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
